

Step Over Platforms & Bridging Systems

Step-over Platforms are used for various ground-level obstacles and possible trip hazards, including pipeline works and machinery, as well as for accessing site offices and other temporary structures.

Our Step-over Platforms enhance both efficiency and safety within the work environment, designed to meet your particular requirements.

Key Benefits

- Configurations made to your requirements
- Wide range of applications
- Adaptable & relocatable
- Quick & easy installation
- Strong & Durable
