YOUR GUIDE TO SECURITY MESH GUARDING

Security Mesh Guarding

Safeguard your assets through the use of security mesh guarding systems.

Security guarding encompasses more than just the protection of your equipment. It is fundamentally about safeguarding the welfare of your workforce while adhering to UK health and safety regulations. Our security mesh guarding systems enhance operational resilience and assist you in establishing a secure work environment, whether it be in a warehouse or factory.

What is Security Mesh Guarding?

Security mesh guarding serves as a form of barrier protection designed to establish a protective shield between machinery, operators, equipment and the like.

Our impact protection is constructed from durable materials like steel and is utilised to enclose heavy-duty equipment and machinery to hazardous areas and chemicals.

Our security mesh guarding guarantees the durability of your equipment and the safety of your workforce.

Construction of Security Mesh Guarding

Frames: Choice of mild steel and stainless steel materials, with a range of box section and angle profiles.

Mesh: Available in 25mm x 25mm x 3mm aperture & 50mm x 50mm x 3mm aperture.
Heavier-duty mesh options are available.

Finish: Choice of powder-coated finishes, galvanised finish and raw state (*stainless steel*).

Demountable, adaptable and relocatable.

Additional add-on products to security mesh guarding:

Barrier Systems & Guard Rails: We can add crash barriers and pedestrian safety barriers/rail to security mesh guarding systems for added protection, creating an even more robust guarding system.
Barrier products and specifications can be found on our website.

What are the benefits of Security Mesh Guarding?

There are many benefits of security mesh guarding, including:

Safety & Protection: At the forefront of our security mesh guarding is safety & protection. Our systems meet your obligations to reduce the risk accidents and injuries by putting in place safeguarding measures, creating a safe and secure environment for your workforce.

Compliance: Our security mesh guarding systems play a key role in meeting and maintaining health and safety regulations. Carrying out risk assessments and/or reviewing building regulations can help to identify and address areas that require attention.

Cost Effective: Security mesh guarding systems can help optimise operational costs by reducing injuries and staff sick days, thus reducing costs from unnecessary expenses surrounding injuries and/or lost working days.

Machinery/Equipment Lifespan: Implementing security mesh guarding in your workplace protects machinery and industrial equipment from damage. This further reduces the need for repairs and replacement of such machinery and equipment, allowing a longer lifespan of your assets and potential cost savings.

Overall Productivity: In essence, having a safe work environment for your workforce increases productivity by providing safe working conditions and streamlining processes.
